

John Lee

Senior Frontend Developer · Software Engineer · Creative Technologist

I design and build digital systems where interface, structure, and interaction work as one continuous experience. My work spans content-driven platforms, data visualisation, VR applications, computational art, and public interactive installations, grounded in long-term software engineering experience.

Helsinki Metropolitan Area

RECENT EXPERIENCE

Adventure Club

Sep 2023 – Present

Senior Frontend Developer / Helsinki Metropolitan Area, Hybrid

Build content-driven digital platforms, interface systems, backend-connected web applications, and immersive VR experiences across client projects and in-house products.

React

Next.js

TypeScript

Storybook

Sanity.io

Node.js

VR

Utopia Music

Jan 2023 – Aug 2023

Data Visualisation Engineer / Helsinki, Hybrid

Built data visualisation tools and interactive interfaces for music data products, combining React applications with D3-powered visualisation systems.

D3.js

React

TypeScript

Data Visualisation

Accenture Song

May 2021 – Nov 2022

Senior Front-end Analyst / Helsinki

Built content-driven websites and interface systems with modern frontend architecture, CMS workflows, testing, and documented reusable component libraries.

React

Sanity.io

TypeScript

Storybook

Testing

CORE SKILLS

Frontend Systems

React, Next.js, TypeScript, Storybook, Sass, testing, CMS integration

Data & Interaction

D3.js, data visualisation, UI architecture, interactive tools, product workflows

Creative Technology

Unity 3D, Unreal Engine, Processing, openFrameworks, OpenCV, physical computing

Software Engineering

C, C++, C#, Objective-C, system architecture, automation software

EDUCATION

MA / New Media Design and Production

Aalto University, Finland / 2017 – 2020

M.Eng / Convergence Content Production

Dongguk University, South Korea / 2014 – 2016

B.Eng / Computer and Information Science

Korea Digital University, South Korea / 2002 – 2007

Engineering, Research & Creative Practice

JOHN LEE /
CV

ENGINEERING BACKGROUND

2019
2020**Lab Automation Software**

Developed automation software for scientific instruments and production workflows as a Senior Software Engineer at Thermo Fisher Scientific.

2010
2016**Mobile Application Architecture**

Designed and implemented software architecture for iOS applications across client and product projects.

1999
2010**Semiconductor & Metrology Systems**

Developed fault detection and classification systems, wafer metrology software, automated microscopy systems, and SECS/GEM communication software across South Korea, Canada, and Japan.

PUBLICATIONS

2017

Tangible Visualization Table for Intuitive Data Display

Symmetry MDPI

2016

Hand Tracking Based Projection Mapping System and Applications

J. of KCGS

CREATIVE PRACTICE

Helsinki Children's Hospital Installation

Group installation / Helsinki, Finland / 2018 – Present

When Light Echoes

Group interactive installation / Seoul, South Korea / 2019

Seeing Sound, Listening to Image

Solo exhibition / Vare Gallery V1, Aalto University / 2019

Drawing Machine

Solo exhibition / IDAS Hong-Ik University, Seoul / 2017

TEACHING

Creative Coding

Aalto University / Sep – Oct 2021

Coding Clinic

Aalto University / Oct – Dec 2019

Internet Technologies and Techniques

Aalto University / Nov – Dec 2019

PROFILE

Focus

Interface systems, data visualisation, VR applications, computational art, and public installations

Working Mode

I work across architecture, prototyping, and implementation, combining engineering depth with visual judgement to bring ideas into production
